

Practical Activity 4 [25 marks]

1. Create an MDI form with the following menu.

File	View Products	Edit Products
-Exit	-List and Search	-Insert and Delete

Exit closes the application, **List and Search** opens Products form and **Insert and Delete** opens Edit products form. Menu example is shown below:

2. Create a Database with one table names Products with the following design.

Column Name	DataType
Product ID	Int
Product Name	nvarchar(50)
Brand	nvarchar(50)
Price	money

Populate your table with data as shown in the following figure.

	ProductID	ProductName	Brand	Price
▶	111	Trekking Pole	K-Way	2,0000
	123	White Long Sle...	Nike	1,0000
	222	Backpack	K-Way	3,0000
	234	Black Jogger pa...	Nike	2,0000
	345	Cargo Pants	K-Way	2,0000
	456	Junior Sweaters	Nike	1,0000
	567	Senior Sweaters	Adidas	3,0000
	654	White Golf-Ts	Adidas	1,0000
	678	Rain Coats	K-Way	3,0000
	891	Beanies	Adidas	1,0000
	910	Customized Sn...	Nike	4,0000

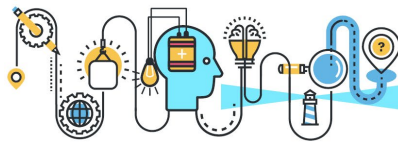

- On the MDI menu, inside the View Products menu item there is a list and search sub-menu. When that menu is clicked, a View Products form should appear listing all the products in a DataGridView as shown in the following figure.

Practical4

The screenshot shows a Windows application window titled "ViewProducts". The menu bar includes "File", "View Product", and "Edit Product". The form contains a "Select Brand" dropdown menu, a "Type product name..." text box, a green "Search Product" button, and a purple "Refresh" button. Below these controls is a DataGridView with the following data:

	ProductID	ProductName	Brand	Price
▶	111	Trekking Pole	K-Way	2,0000
	123	White Long Sleeve	Nike	1,0000
	222	Backpack	K-Way	3,0000
	234	Black Jogger pants	Nike	2,0000
	345	Cargo Pants	K-Way	2,0000
	456	Junior Sweaters	Nike	1,0000
	567	Senior Sweaters	Adidas	3,0000
	654	White Golf-Ts	Adidas	1,0000
	678	Rain Coats	K-Way	3,0000
	891	Beanies	Adidas	1,0000
	910	Customized Sneakers	Nike	4,0000
*				

- On the View Products form, a user must be able to filter the available by brands using a ComboBox or by typing the name of the product in a textbox and click the search button. The refresh button must refresh the GridView after the search and filtering. The following is an example of items used to filter using ComboBox.

STUDY UNIT 2

Database File Handling

	Name	Brand	Price
	Trekking Pole	K-Way	2.0000
123	White Long Sleeve	Nike	1.0000
222	Backpack	K-Way	3.0000
234	Black Jogger pants	Nike	2.0000
345	Cargo Pants	K-Way	2.0000
456	Junior Sweaters	Nike	1.0000
567	Senior Sweaters	Adidas	3.0000
654	White Golf-Ts	Adidas	1.0000
678	Rain Coats	K-Way	3.0000
891	Beanies	Adidas	1.0000
910	Customized Snea...	Nike	4.0000

5. On the Edit Products Items, a user must be able to add new products to the table and delete existing products in the same table. Create another child form that will perform this functionality as shown below:

Insert New Product

ProductID

ProductName

Brand

Price

Insert Product

Delete Product

Enter ProductID

Delete Product

NB: Do not forget to provide feedback using control such as `MessageBox` .
