

Activity 5: Multiple Pages and Cookies

NWU sports has approached you to develop a simple sports registration website for students. This website must enable students to register their names, surnames, gender and select their preferred sporting code. When a student clicks the submit button, a confirmation page should appear with a registration success message and the must also show the next training session to the student. The students must also be able to navigate back to the registration page. Use the following screenshots as a guide.

Please style your website and make sure all your controls are nicely aligned. You are allowed to use the background color/image of your choice. Marks will be awarded for your creativity.
